

* Short description of the project

- This app allows you to generate the address of the AVA network, and you can use this address to get the AVA token from the AVA faucet. This address can also create your own assets, and you can also send your own assets to others.

* Attach a max 2-page write-up describing what your submission is/does. Please provide a publicly accessible link.

- 參考pdf文件

* Attach documentation for how to run/use the project. Please be as clear and detailed as possible, otherwise, it may reduce point allocation. Please provide a publicly accessible link.

- 參考專案的readme.md檔案內容

* Provide a list with links, if possible, of all the used work created by others

- laravel: <https://laravel.com/docs/5.8>

- faucet: <https://github.com/ava-labs/ava-faucet>

- gecko: <https://github.com/ava-labs/gecko>

* A link to the project's Github repository

* A link to a Youtube video of a short presentation about the project and demonstrating it (max 10 minutes).
